I am writing to state my objection to the concept of a Wal-Mart bank. It seems to me that Wal-Mart is out to take over the world. What ever happened to the anti-trust laws that were designed to protect the general public? Allowing any company too much concentration of power is something we once realized would, in the long run, only benefit a privileged few. In considering this question please keep in mind the interests of everyone, not just the interests of wealth and power.

Sincerely,

Sara Graziosa
